## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Because in claims 1 and 13, the phrase "...satisfy a relationship that **first vectors**, each being either **one of two** screen vectors in a spatial frequency domain defined by basis vectors in two directions of a halftone dot pattern in the first -color or second-color halftone screen, are parallel to each other and second vector, each being the other one of the two screen vector are not parallel to each other". Two screen vectors, they are either parallel to each other or not parallel to each other, the examiner does not see how it is possible to have a vector A parallel to another vector B and have vector A not parallel to vector B at the same time.

Claims 2-12, 12-15 are rejected under 35 USC 112 first paragraph because they depend on rejected claims 1 and 13.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Because in claim 1, the phrase "...satisfy a relationship that **first vectors**, each being either **one of two** screen vectors in a spatial frequency domain defined by basis vectors in two directions of a halftone dot pattern in the first –color or second-color halftone screen, are parallel to each other and second vector, each being the other one of the two screen vector are not parallel to each other". Two screen vectors, they are either parallel to each other or not parallel to each other, the examiner does not see how it is possible to have a vector A parallel to another vector B and have vector A not parallel to vector B at the same time.

Claims 2-12, 12-15 are rejected under 35 USC 112 second paragraph because they depend on rejected claims 1 and 13.
